

Waste Management

1. Solid Waste Management: Ecobins': separate waste bins (made from card boards) for paper/biodegradable waste and plastic and non biodegradable waste is installed in all our class rooms, staffrooms, labs and office. A biogas plant is functioning at the ladies hostel inside the campus. Exhaust fans are installed in laboratories to purify and ventilate lab atmosphere.
2. Liquid Waste Management : Soak pits, biogas plant, septic tanks etc are being used for management of sewage and liquid waste.
3. E waste management: The segregated electronic waste get collected in the segregation room and are separately kept. All these are categorized into plastic and other toxic materials and are regularly given to scrap collectors listed and approved by district suchitwa mission directorate. AMC is given to IT technical group to have better maintenance of IT infrastructure.
